First steps in LaTeX

Luke Garrigan *

October 3, 2016

When you write a paragraph with LaTeX you do not need to bother about the formatting. LaTeX will take care of it.

When LaTeX encounters a blank line the current paragraph finishes. Next time it finds some text it starts a new paragraph.

List of things to do:
Learn LaTeX, practice with LaTeX, become a LaTeXpert, write a book on LaTeX, bore the pants of students with LaTeX.

I am 100% sure youll have no problem using LaTeX ... I am prepared to bet 1£on it (I am not mad!).

"This is an incorrectly formatted quote".

This is a correctly formatted quote
